

Fern & Fig

Indoor plants that survive an HDB flat

Low light

ZZ Plant, 15cm pot	\$32.00
Survives dark corners, forgotten watering and air conditioning. Nearly unkillable.	
Snake Plant 'Laurentii', 17cm pot	\$38.00
Upright, architectural, and happy in almost any corner. Water monthly.	
Cast Iron Plant, 15cm pot	\$42.00
Named for a reason. Deep shade, low water, decades of life.	

Statement

Monstera Deliciosa, 20cm pot	\$68.00
About 60cm tall with three or four fenestrated leaves. Needs a bright window.	
Fiddle Leaf Fig, 24cm pot	\$128.00
1.1m tall. Beautiful and famously opinionated — bright indirect light, no draughts, no moving it around.	
Rubber Plant 'Tineke', 20cm pot	\$78.00
Cream and green variegation, thick glossy leaves. Tougher than a fiddle leaf.	

Trailing

Pothos 'Marble Queen', 13cm hanging pot	\$28.00
Trails fast, roots in water, forgives everything. The plant we give beginners.	
Heartleaf Philodendron, 13cm hanging pot	\$28.00
Softer and faster than pothos, and happier in lower light.	

Pots & care

Terracotta Pot with Saucer, 18cm	\$22.00
Unglazed, so the soil breathes. What most of our plants would prefer.	
Indoor Plant Food, 250ml	\$16.00
A gentle liquid feed. Once a fortnight through the growing months, never on dry soil.
